# Jarvis

Just a rather very intelligent system

# A VC's most valuable asset is judgment.

**It lives in the wrong places.**

Scattered across heads, emails, tools and docs that are siloed and fragmented.

**Scale breaks memory.**

30 portfolio companies. 100+ LPs. 1,000s of relationships.

**Context is fragile.**

It is lost when our memory fails. One departure, one missed handover, and years of pattern recognition disappear.

**The cost of forgetting is invisible.**

You never see the connection you never made.

# JARVIS is our second brain.

> Every connection discoverable.
> Every context searchable.
> Nothing forgotten.

# What is JARVIS

### INDIVIDUAL BRAIN

WHAT YOU JUST SAW

Cornelius - the full demo

WHAT'S NEXT

Each team member gets one

### ORG BRAIN

WHAT YOU JUST SAW

Portfolio synergies, company updates

WHAT'S NEXT

Shared knowledge layer across the team

### STAKEHOLDER INTERFACE

WHAT YOU JUST SAW

–

WHAT'S NEXT

Curated feeds for founders and LPs

**Private by default, shared by intent.**

# How it works

**WORKFLOWS**

Natural language commands that trigger complex multi-step operations

*"What's new with Hanseatic?" · "Show me connections between Fabric and the portfolio"*

**AI AGENTS**

Semantic search · Connection discovery · Insight extraction · Research synthesis

Claude as the reasoning engine

**KNOWLEDGE GRAPH**

Obsidian · Markdown files · Local-first · No vendor lock-in

223 notes · 1,300+ connections · You own your data

**DATA SOURCES**

Raw data ingested from operational tools via API connectors and structured into the knowledge graph

- Gmail
- Google Drive
- Carta
- QuickBooks
- Notion
- Attio
- LinkedIn
- Calendar
- Web Clipper

# Architecture: first principles

**INSTITUTIONAL INTELLIGENCE**

The firm knows everything every team member knows. No knowledge lost. Every connection discoverable.

**NETWORK OF BRAINS**

Every team member runs their own AI-augmented knowledge graph.
The network connects them. Individual intelligence compounds into institutional intelligence.

**TWO VAULTS PER PERSON**

**Personal vault:** private thinking, health, personal notes.
**Company vault:** research, portfolio, strategy, contacts.
Hard boundary. Separate directories. Separate indexes.

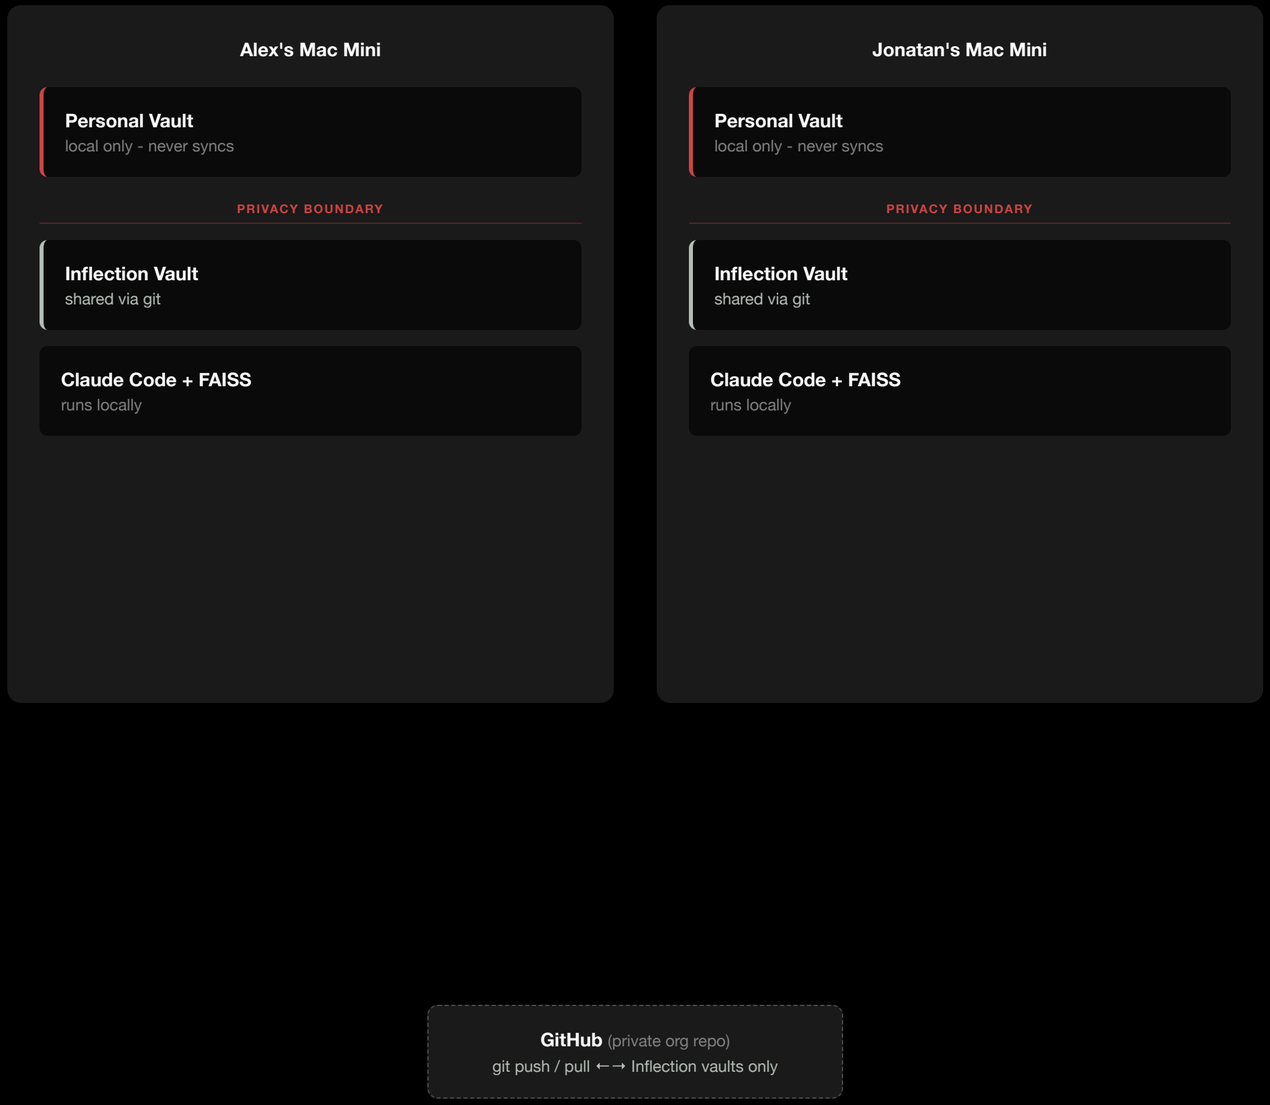
**SYNC VIA GIT**

Company vault = private GitHub repo.
Clone, pull, commit, push.
Full history. Offline-capable.

**AI LAYER IS LOCAL**

Claude Code on each Mac Mini.
FAISS index per vault, per machine.
No cloud AI sees private data.

# Architecture: privacy model



## What stays private

Personal vault never leaves your machine. No symlinks, no shared access, no exceptions.

## What syncs

Company vault syncs via git. You control what enters. One-way valve: personal to company. Never reverse.

## How AI stays contained

Claude Code runs locally on each Mac Mini. Vector indexes are per-vault, per-machine. No cloud inference on private data.

## How conflicts resolve

Git handles merge conflicts on markdown. Last editor owns the merge. Author attribution via frontmatter.

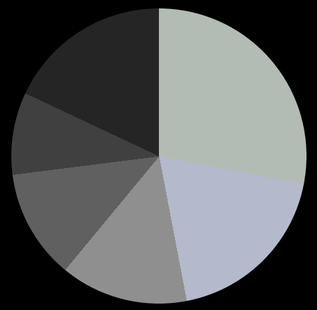
# One question. Full context.

Six queries that take 30 minutes today
and 30 seconds with JARVIS.

INPUT

> I need a quick view of the portfolio. What are our top 5 positions by NAV and trajectory?

OUTPUT



- **Fabric** — 28%
- **Ark** — 19%
- **Ubitium** — 14%
- **Hedy** — 12%
- **Tune Insight** — 9%
- Other (9) — 18%

| COMPANY | NAV | TRAJECTORY | SIGNAL |
|---|---|---|---|
| **Fabric** | 4.2M | ▲▲ Strong up | Series A termsheet from Lux Capital at 3.2x markup. VPU tape-out on schedule. |
| **Ark** | 2.9M | ▲▲ Strong up | NATO DIANA cohort selected. 2,400 units deployed. Revenue 3x YoY. |
| **Ubitium** | 2.1M | ▲ Up | Elite CTO hired (ex-NVIDIA). First silicon Q3. $1.2M in LOIs. |
| **Hedy** | 1.8M | ▲ Up | Bundeswehr pilot contract signed. Team doubled to 14. Runway 24 months. |
| **Tune Insight** | 1.4M | • Stable | Revenue growing 40% QoQ. FHE performance breakthrough - 12x speedup. |

INPUT

> I need a list of the top 10 LPs who can write $500K - $3M checks and who are based in NY or Boston.

OUTPUT

| # | LP / FAMILY OFFICE | LOCATION | CHECK RANGE | PARTNER | STATUS |
|---|---|---|---|---|---|
| 1 | Serafund | New York | $1M - $3M | David Wachtel | Met at EUVC Summit. Follow-up Feb 18. |
| 2 | Northstar Ventures FO | Boston | $500K - $2M | Rebecca Haines | Warm intro via Lakestar. First call done. |
| 3 | Comerica Wealth | New York | $1M - $2.5M | James Okoro | LP in Outsized. Asked for intro to us. |
| 4 | Tiedemann Advisors | New York | $500K - $1.5M | Sarah Lindgren | Met at Slush NYC. Deep tech allocation expanding. |
| 5 | Kendall Capital Partners | Boston | $1M - $3M | Michael Cheng | Ex-a16z scout. Interested in EU defense. |
| 6 | Beacon Hill FO | Boston | $500K - $1M | Anna Kowalski | Referred by Earlybird. Prefers co-invest. |
| 7 | Sievert Family Office | New York | $2M - $3M | Henrik Sievert | German-American family. Infra background. |
| 8 | Winthrop Partners | Boston | $500K - $2M | Thomas Walsh | MIT endowment adjacent. Compute thesis. |
| 9 | Atlas Merchant Capital | New York | $1M - $2M | Diana Proust | Allocating to emerging managers. Data room requested. |
| 10 | Peregrine Ventures FO | New York | $500K - $1.5M | Robert Tanaka | LP in Blueyard. Complementary EU exposure. |

Sources: Mars LP CRM, meeting notes, email threads, event logs. 3 have requested data room. 2 are LPs in co-investor funds.

INPUT

> I am researching the electrification of the mining industry. Who are the top experts on this in my network?
>
> Pick one for each: founder, policy expert, co-investor.

OUTPUT

FOUNDER

**Lars Henriksson** — Strongest match

CEO & Founder, Epiroc Electrification (prev. Boliden)

Built the first fully electric underground mine in Sweden. 15 years in mining electrification. Met at Nordic Innovation Summit. Connected via Radical deal flow.

POLICY EXPERT

**Dr. Maria Teresa Vasconcelos** — Direct contact

European Commission DG GROW - Head of Unit, Raw Materials

Led the Critical Raw Materials Act. Keynote at EUVC panel. Exchanged emails on SQM and lithium supply chains.

CO-INVESTOR

**Arnaud Castaignet** — Monthly sync

Partner at Lux Capital - Climate & Industrial

Led investments in Redwood Materials and Lilac Solutions. Co-invested with us in Fabric. Active in battery/mining convergence thesis.

ALSO FLAGGED (UNSOLICITED)

**Prof. Kai Vuorilehto**
Aalto University, Battery Tech Lab. 3 papers in our library on mining fleet electrification.

**Jessica Obermayer**
McKinsey, Metals & Mining. Co-authored report we clipped. Jonatan met her in Zurich.

INPUT

> I am evaluating a counter-UAS company. List all companies we've seen in 12 months building competitive or complementary products.

OUTPUT

COMPETITIVE - DIRECT COUNTER-UAS

| COMPANY | HQ | PRODUCT | OUR ASSESSMENT |
|---|---|---|---|
| **Dedrone** | Virginia, US | RF-based drone detection + classification platform | Acq. by Axon. Strong detection, weak kinetic defeat. |
| **DroneShield** | Sydney, AU | Multi-sensor detection + electronic countermeasures | Public (ASX). Hardware-heavy, high unit cost. NATO. |
| **Sentrycs** | Tel Aviv, IL | Protocol-based cyber takeover of drones | Passed. Single-vector, fragile vs autonomous drones. |

COMPLEMENTARY - ADJACENT STACK

| COMPANY | PRODUCT | STACK LAYER | CONNECTION |
|---|---|---|---|
| **Hedy** (portfolio) | Resilient mesh communications | Comms infrastructure | Portfolio company. Direct bridge to any C-UAS investment. |
| **Echodyne** | Metamaterial scanning radar | Radar detection | Reviewed Nov 2025. Too late stage. Potential Hedy partner. |
| **Bluehalo** | Directed energy (LOCUST laser) | Kinetic defeat | In defense research notes. US-focused, no EU presence. |
| **Quantum Systems** | Fixed-wing VTOL recon drones | ISR / surveillance | Met founder at Munich Security. Bundeswehr supplier. |
| **Phosphorus** | IoT/OT cybersecurity | Cyber hardening | Auto-discovered. Tune Insight link via encrypted compute. |

3 direct competitors. 5 complementary stack components. 1 portfolio company (Hedy) with direct integration potential.

INPUT

> Which of our portfolio companies are raising funds in the next 3 months and in which order of magnitude?

OUTPUT

5 companies with active or expected fundraises in the next 90 days. Dilution and NAV projections based on latest board materials, comparable rounds, and investor signals in the knowledge base.

| COMPANY | ROUND | TIMING | TARGET RAISE | PRE-MONEY | DILUTION | OUR NAV POST | MARKUP |
|---|---|---|---|---|---|---|---|
| **Fabric** | Series A | Q2 2026 | $12M | $35M | 25% | $6.3M | 3.2x |
| **Deep Earth** | Series A | Q2 2026 | $8M | $25M | 24% | $3.8M | 2.5x |
| **Hedy** | Seed Ext. | Q1 2026 | $4M | $18M | 18% | $2.1M | 1.8x |
| **Radical** | Seed Ext. | Q2 2026 | $3M | $16M | 16% | $1.9M | 1.5x |
| **Tune Insight** | Bridge | Q1 2026 | $2M | $15M (flat) | 12% | $1.4M | 1.0x |

| TOTAL RAISES | AVG DILUTION | PORTFOLIO NAV IMPACT | PRO-RATA REQUIRED |
|---|---|---|---|
| **$29M** | **19%** | **+$3.2M** | **$1.1M** |

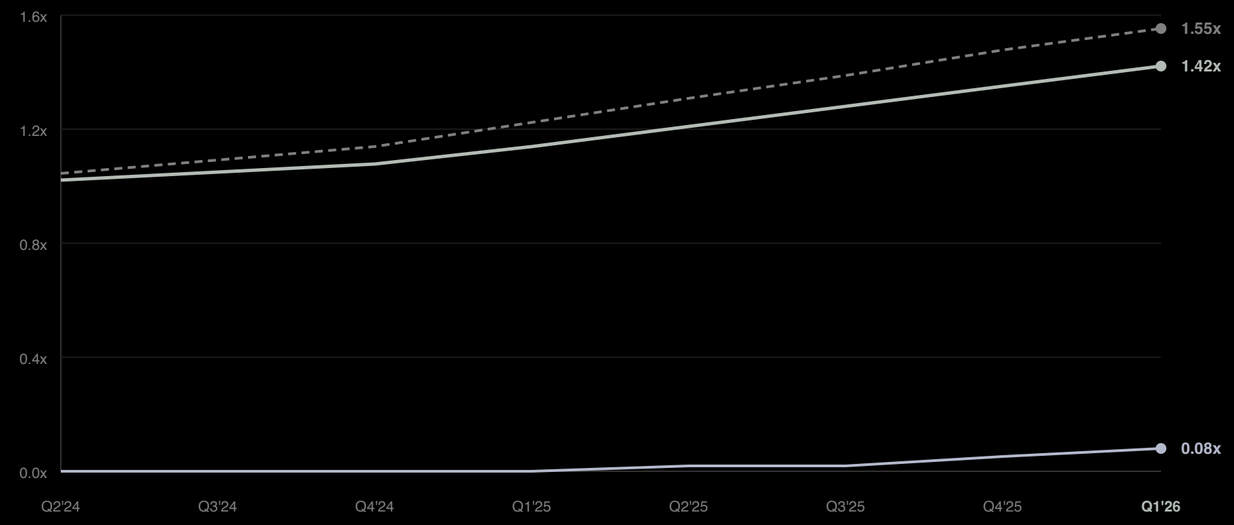
Sources: Board decks, investor update letters, Carta cap tables, partner call notes. Fabric and Deep Earth termsheets are live. Hedy and Tune Insight timelines from founder conversations.

INPUT

> Display our fund performance over the last 8 quarters by showing TVPI, MOIC and DPI over time.

OUTPUT

Mercury Fund (Fund II) - performance metrics Q2 2024 through Q1 2026. Gross MOIC based on portfolio markings. Net TVPI after fees and carry. DPI reflects realized distributions.



**Net TVPI** 1.42x **Gross MOIC** 1.55x **DPI** 0.08x

| NET IRR | CALLED CAPITAL | RESERVES | VINTAGE |
|---|---|---|---|
| 18.4% | 72% | $2.8M | 2022 |

Sources: QuickBooks (cash flows), Carta (cap tables and markings), quarterly LP reports. Markings follow IPEV guidelines. Next LP report due March 31.

# Roadmap

Q1 2026

## Individual brains

Mac Mini per person
Two vaults each
Full Cornelius stack
Team onboarding

Q2 2026

## Shared org layer

Git-synced company vault
Cross-brain search
Author attribution
Merge conventions

Q3 2026

## Stakeholder interface

Founder briefs
LP portfolio updates
Curated knowledge feeds
Automated reporting

LONG TERM

## External rollout

Offer to portfolio companies
Productize for other funds
Open-source components
Community development
